ScienceDirect

A principal plataforma de textos completos de literatura acadêmica revisada por pares

ScienceDirect hoje

Com o ScienceDirect, você acessa a mais de:

16 milhões de artigos

2.500 periódicos representando mais de **612.000** tópicos

39.000 livros, incluindo trabalhos de referência

Arquivos digitais que remontam a **1823**

+ de **900.000** artigos de acesso aberto

“O ScienceDirect oferece uma plataforma fácil de operar que oferece acesso conveniente a um amplo espectro de publicações de pesquisa interessantes e úteis que eu talvez nunca tenha considerado explorar.”

— Pesquisador/ Funcionário
Área de Ciências da Vida, EUA

O conteúdo de livros é um complemento essencial ao conteúdo de revistas

CONTEÚDO DE LIVROS

Amplitude para conectar disciplinas

- Facilitando novos caminhos para a pesquisa
- Abrangente
- Ferramenta de aprendizado
- Ângulo amplo
- Novos tópicos ou revisão de antigas áreas

CONTEÚDO DE ARTIGOS

Profundidade para desenvolvimento de disciplinas

- Conhecimento especializado
- Foco estreito
- Extrema profundidade
- Últimas pesquisas/ novos resultados
- Aplicando técnicas

O acesso a livros e a revistas em uma mesma plataforma fornece discernimentos mais significativos

TODO DIA, pesquisadores acessam no ScienceDirect uma média de:

79,226
CAPÍTULOS DE LIVRO
(11.976 livros)

1,230,022
ARTIGOS DE REVISTA (3.857 periódicos)

dos usuários pesquisados concordam que em seu trabalho **eles geralmente usam livros e periódicos juntos**

Review

The effectiveness of treatments for androgenetic alopecia: A systematic review and meta-analysis

Areej Adil BSc, Marshall Godwin MSc, MD

Background

Androgenetic alopecia, or male pattern hair loss, is a hair loss disorder mediated by dihydrotestosterone, the potent form of testosterone. Currently, minoxidil and finasteride are Food and Drug Administration (FDA)-approved, and HairMax LaserComb, which is FDA-cleared, are the only treatments recognized by the FDA as treatments of androgenetic alopecia.

Objective

This systematic review and meta-analysis assesses the efficacy of nonsurgical treatments of androgenetic alopecia in comparison to placebo for improving hair density, thickness, growth (defined by an increased anagen telogen ratio), or subjective global assessments done by patients and investigators.

Hair Loss

Hair loss is currently one of the most common “problems” dealt with by NHP behavioral management staff.

Hair loss in women

Joseph E. Pizzorno ND, ... Herb Joiner-Bey ND, in *The Clinician's Handbook of Natural Medicine (Third Edition)*, 2016

Side effect of drugs

Hair loss concurrent with taking one of the drugs listed in the accompanying table does not indicate that the drug is the sole cause of hair loss. For chemotherapy agents (e.g., fluorouracil), the link is obvious. When medically appropriate, natural alternatives to suspected culprits should be used.

Diseases of Hair and Nails

Antonella Tosti, in *Goldman's Cecil Medicine (Twenty Fourth Edition)*, 2012

Hair Loss and Alopecias

Hair loss distresses most patients, independently from its severity and pattern. In some cases, the decrement in quality of life attributable to hair loss is comparable with that caused by major chronic diseases.

The first diagnostic step is to assess family history, drug intake, systemic illness, and severity and duration of hair loss (Table 450-1). The second step is to establish whether the hair density is normal or

Internationalization; Performance; Wood manufacturing industry; S-shape

1. Introduction

A quick look at the forest sector uncovers the increasing importance of internationalization in the industry, especially in recent years. Foreign direct investment (FDI) (Laaksonen-Craig, 2004) and the global export value (Zhang et al., 2014) have rapidly increased in the forest and wood manufacturing industry, and make internationalization a necessity in forest economic impacts of trade in the forest sector, international trade to be an important research substantially affects the global welfare of the sector internationalization as a widespread strategy for its consequences at corporate level has become of research outcomes has also led to a number of meta-analysis studies being published (e.g., Bausch and Krist, 2007; Marano et al., 2016). Unfortunately, this is not true in the case of the forest sector. Despite the obvious lack of

2. Theoretical frame of reference

2.1. Theoretical perspectives

I-P studies have mainly applied different mainstream theories such as **finance theory** of portfolio diversification, the **resource-based view**, **transaction cost** economies, and organizational **learning theory** to understand how internationalization affects company performance (Hennart, 2007; Tsao and Chen, 2010). However, again there is no consensus about the most suitable frameworks to decipher the relationship. In his seminal discussion, Hennart (2007) has critically evaluated the current arguments in the field and concluded that there is no theoretical basis for expecting a systematic I-P connection. However, he suggested transaction cost economies as an applicable rationale to explain the performance

Transaction Cost

Transaction costs are an important source of reluctance among farmers for adapting to future climate change, as understanding climate impacts and the uncertainty of such impacts may exceed the time and resources available to the farm manager.
